

Assignment – HTML, CSS, PHP, MySQL

Build a simple School application to print marksheet of any student. User should be able to mention name or roll number of the student and system should fetch marks of the student from database and print the marksheet. Please refer to the sample below for format of the marksheet to be generated.

School / College Name				
Class:	IX	Session:	2019-20	
Roll:		Date of Birth		
Name :		Father's Name		
Subjects	Total Marks	Passing Marks	Marks Obtained	Grade
English	100	35		
Math	100	35		
Physics	100	35		
Chemistry	100	35		
Biology	100	35		
Total Marks :			Obtained Marks:	
Passing Marks:			Percentage:	
Result:			Grade:	

Tasks to be done:

1. Create database table(s) for storing student details and marks in MySQL.
2. Create Marksheet Page design using HTML and CSS
3. Write PHP program to fetch student details and marks from Database based on student Roll Number or Name and generate marksheet in the above format.
4. Optionally, create a search form where user can enter student name or roll number button to print marksheet. Please see below:

Print Marksheet	
Enter Student Name or Roll Number	<input type="text"/>
<div>PrintCancel</div>
